

## INSTALLATION MANUAL

Prepare the required components (C x1).  
First, remove the pre-installed Q from component C, then insert C into D.  
Finally, secure C and D in place using Q.

## INSTALLATION MANUAL

Prepare the required components (G x2, H x2, J x4, M x4, O x2).  
As illustrated, connect G and D using components G, J, and M,  
then securely screw O into the threaded mounting holes on G.

Prepare the required components (F x2).  
First, remove the original vehicle screws from the rear window hinge.  
Insert component F into the hinge assembly,  
then secure both the hinge and F by reinstalling the original screws

## INSTALLATION MANUAL

Prepare the required components (E x2).  
First, loosen the two screws at the bottom of E,  
then snap E into the rain channel as illustrated.

Prepare the required components (H x4, I x4, K x8, L x8).  
Lift the pre-assembled luggage frame onto the roof,  
secure F to the roof rack using H, I, K, and L.  
Slide E to align with the mounting holes on the luggage frame,  
tighten with H, I, K, and L, then fully tighten the base screws of E.
