Prepare the required components (A x1, D x2). First, remove the pre-installed K from component A, then insert A into D. Finally, secure A and D in place using K.

## **INSTRLLATION MR**

Prepare the required components (B x5, J x10, L x10). First, screw components J and L into the mounting holes of B (Note: do not fully tighten, ensuring sufficient clearance between B and L). Then, slide component L into the groove of D. Finally, position B at the desired location and fully tighten J (Note: ensure the crossbar adjustment does not block the screw holes).
